## THE BLUEBIO COFUND OPENS A NEW CALL FOR PRE-PROPOSALS

**The call has a budget of 11 million Euro and is targeted specifically on supply systems in the blue bioeconomy: logistics and transportation – from harvest to processing.**

The scope of the call is to fund projects that facilitate the transfer (i.e. logistics, preservation and transportation) of bio-resources from harvest (catch or production) to processing to ensure e.g. traceability, quality, sustainability and the necessary quantity or pre-processing of the bio-resources for conversion into products for the market. This entails also the supply systems to primary producers for aspects affecting the bio-resources as it moves further in the value chain.

## Participation in the Call

13 partners from 12 countries have contributed 11 million EUR to the call. The following partner countries will provide funds: Belgium, Croatia, Denmark, Estonia, Greece, Iceland, Ireland, Latvia, Malta, Norway, Romania and Spain. All projects are open to partners from all countries, as far as they bring their own funds.

Each project must include at least three partners from three countries and at least one industry partner.

*There is an option to find partners on European level:*
